

Palliative Care Education

Are you a care assistant – in the home,
in aged residential care or in hospital care?

Do you care for patients who are nearing end of life?

Do you feel ill-equipped for the varied situations that can occur at this time?

Our Palliative Care for Care Assistants education will lift your skills and help you manage day-to-day with patients who are dying.

This programme, run by experienced palliative care providers, will introduce you to the basics of palliative care, and explore patient and family communication, pain management and dealing with grief and loss.

This programme is
FREE OF CHARGE.
